Enthusiastic and results-driven Python Full Stack Developer with 1 year of experience in developing robust web applications. Proficient in front-end and back-end development, with a strong understanding of responsive design principles, RESTful APIs, and database management. Adept at collaborating in agile environments and committed to continuous learning and improvement.

Experience

- Python Full Stack Developer Intern

2015 - 2017

 - Developed and maintained dynamic web applications using Django and React, resulting in a 20% increase in user engagement.
 - Collaborated with front-end and back-end teams to design and implement RESTful APIs, enhancing data exchange efficiency between client and server.
 - Implemented responsive design principles using Bootstrap and custom CSS, improving the user experience across various devices.
 - Integrated third-party APIs and services, such as payment gateways and social media logins, expanding the application's functionality
- Python trainee

2017 - present

 - Developed a responsive website clone of PaperGrid using HTML, CSS, Bootstrap, and JavaScript.
 - Implemented user authentication and authorization features using Django's built-in authentication system.
 - Integrated a RESTful API for dynamic content loading and data manipulation.
 - Built a full-featured e-commerce platform with Django, allowing users to browse products, manage carts, and complete purchases.
 - Developed an admin panel for managing products, orders, and users, streamlining business operations.
 - Optimized the application for performance and SEO, increasing site traffic and sales.

Education

- High School

2019

 - computer science
- Calicut university

2024

 - Bachelor of computer application
